SAMPLE ANSWER SHEET - SCIENCE

Student: Rahul Sharma
Roll No: 101
Class: 10
Total Marks: 20

Q1. What is photosynthesis? (5 marks)

Photosynthesis is the process by which green plants make their food.
Plants use sunlight, carbon dioxide and water to produce glucose.
Chlorophyll absorbs light energy and oxygen is released.

Q2. State Newton's first law of motion. (5 marks)

An object remains at rest, or continues moving with uniform velocity
in a straight line, unless acted upon by an external unbalanced force.

Q3. Define evaporation. Give one example. (5 marks)

Evaporation is the change of a liquid into vapour from its surface
at temperatures below the boiling point.
Example: drying of wet clothes.

Q4. Why is the sky blue? (5 marks)

The sky appears blue because shorter wavelengths of sunlight are
scattered more strongly by molecules in the atmosphere.
